Agreement between study Principal Investigator and

IDEAL for imaging data management

Definitions:

- Study – The research project being conducted requiring imaging on multiple subjects over a specified set of time
- Imagine Data – Any radiographic or pathologic pictures obtained of subject within a study
- Image research database – A repository of imaging data that is separate from the hospital picture archiving and communications system (PACS)

IRB: _____

Study name:

_____

Principal Investigator (PI): _____

Co-Investigator(s): _____

Research assistant(s): _____

As Principal Investigator (PI) for the above-named study, I authorize IDEAL staff to de-identify and store imaging data obtained from subjects in this study within IDEAL's imaging research database. Either I, the co-investigator(s), or the research assistant(s) will provide for IDEAL information on how to identify these study subjects in writing. I certify that the subjects whose imaging data are provided to IDEAL have given consent sufficient to allow IDEAL to store the imaging data and, if appropriate such data outside of WCMC as specified by the study protocol. I am aware that IDEAL staff will make no further check on subject consent.

Signed: _____
